

OVER **85%** OF PATIENTS & CRITICAL CARE NURSES WOULD SPECIFICALLY REQUEST THE **SUCTIONSHIELD**.

HAI's negatively impact satisfaction among patients and nurses

PROSPECTIVE PATIENTS*

86%

Are concerned about acquiring an HAI if they needed surgery.

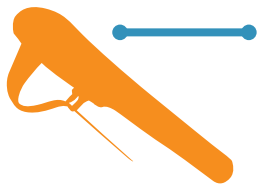

68%

Would refuse a hospital their doctor recommended because of a hospital's poor infection scores.

84%

Believe hospitals should have safety protocols for oral suction tips.

94%

Would be satisfied if their hospital used a SuctionShield to store their oral suction tips.

85%

Would request SuctionShield specifically in the hospital.

A disposable holster that attaches to virtually any horizontal surface to hold suction implements, helping to reduce cross contamination and HAIs.
